### “Henna for Pro” 100% Natural Henna

#### Henna for Pro

This 100% natural coloring is a mixture of henna and herbs that have various effects. Distinguishing features of this product include its treatment effects, which give hair bounce, strength, and shine, and prevent UV damage. It also has a strong scalp care effect from the polyphenols and vitamins it contains. The more you use it, the more you will feel bounce and strength in your hair, the healthier your scalp will be, and the better natural coloring you can achieve.

#### Changes in dark henna

From green to brown after 3 to 7 days

## “Henna for Pro” Henna with HC dye 100g

We add cosmetic dyes to the henna to make the color stronger.

We add cosmetic dye (HC = hair color) to our henna to make the color stronger. HC is pH neutral, less irritating, and very safe. Unlike acidic dyes such as those used in manicures, it does not stain skin of the hands or scalp. It also has a small molecular weight, so it penetrates deep into the hair and dyes well, but fades quickly. It does not cause allergic reactions with diamine.

**\*All registered as cosmetic products**  
**Shelf life is 3 years (Diamine Free)**

### Pinkberry Treatment
